

Sean Paul S. Lapasanda

Full Stack Developer

seanpaullapasanda@gmail.com | Davao City, Philippines | ichiharashii.dev | linkedin.com/in/seanpaul-lapasanda

PROFESSIONAL SUMMARY

Junior Full Stack Developer with hands-on professional, academic, and personal experience building web applications and business systems. Experienced in frontend and backend development, database management, REST API integration, and modern web technologies using React, Laravel, PHP, TypeScript, and SQL. Adaptable and eager to learn new technologies, with a strong problem-solving mindset and a focus on building clean, maintainable solutions to real-world problems.

TECHNICAL SKILLS

Frontend: React, TypeScript, HTML5, Tailwind CSS, Next.js, Nuxt.js, Vue.js

Mobile: React Native, Expo, Expo Router

Backend: Laravel, FastAPI, PHP, Python, REST APIs, Node.js, PostgreSQL, MySQL, Convex

Dev Tools: Git, GitHub, GitLab, VS Code

Cloud & DevOps: Vercel, Railway, Amazon S3, Docker, Cloudflare

PROFESSIONAL EXPERIENCE

Full Stack Developer (Project-Based), EBOS SG PTE LTD

06/2026 – 07/2026

Enterprise recruitment CRM automating candidate workflows and outreach using [Laravel](#), [Vue.js](#), and [MySQL](#).

- Worked on third-party API integrations (Gmail, Outlook, and Telegram) to centralize recruiter communications in the web app.
- Built OAuth 2.0 connection flows and Laravel webhook handlers to receive real-time message notifications and sync candidate data.
- Created user-facing forms and inbox interfaces with Vue 3 and Inertia.js, connecting frontend state to backend REST endpoints.

Full Stack Developer Intern, F.M. Morata Customs Brokerage & Law Firm

02/2026 – 05/2026

Customs brokerage and legal operations platform built with [Laravel](#), [React](#), and [MySQL](#).

- Developed core web application modules for an internal operations system, building import/export transaction tracking, status review gates, and multi-department workflows.
- Integrated OnlyOffice Document Server into the legal module, enabling in-browser document editing and automated template-based document generation.
- Implemented Laravel background queue jobs and AWS S3 storage to handle bulk document processing and multi-file ZIP archive exports asynchronously.

Crew Trainer, Golden Arches Development Corporation

09/2022 – 04/2026

Part-time role balancing academic responsibilities: customer service, food and beverage preparation, and crew training.

- Prepared food products per company procedures, quality, and safety standards while maintaining cleanliness and sanitation.
- Trained and guided new crew members and managers on station procedures, kitchen operations, and quality standards.
- Maintained cleanliness, organization, sanitation, and proper food handling in assigned production areas.

PROJECTS

Fukurou: Automated Schedule Import & Shift Management Platform

Personal Project

[React Native](#) · [TypeScript](#) · [FastAPI](#) · [PostgreSQL](#)

Mobile application parsing shift rosters, timetables, and spreadsheets into verified calendar entries

- Developed a cross-platform mobile application using React Native and FastAPI that converts screenshots, PDFs, CSVs, and Excel files into verified calendar schedules.
- Integrated native on-device OCR (iOS Apple Vision, Android Google ML Kit) and a backend PaddleOCR pipeline with a confidence-scoring layer for offline and server-side text extraction.
- Implemented FastAPI REST endpoints with JWT refresh token rotation and rate limiting, paired with native home-screen widgets for real-time schedule tracking.

eMediCard: Digital Health Card Management Platform

Capstone Project

[React Native \(Expo\)](#) · [Next.js 15](#) · [Convex](#) · [TypeScript](#) · [Turborepo](#)

Digital healthcard permit management and anti-fraud QR verification system for Davao City.

- Built a Turborepo monorepo housing an Expo (React Native) mobile application and a Next.js 15 admin portal, consuming a unified backend workspace package for end-to-end type safety.
- Developed a real-time serverless backend in Convex, using reactive queries and mutations to synchronize multi-stage permit workflows and automated cleanup cron.
- Implemented a hybrid payment workflow (automated online checkout webhooks and on-site receipt verification), paired with dynamic digital QR health card generation and public anti-fraud verification.

EDUCATION

Bachelor of Science in Information Technology, STI College Davao

2022 – 2026

LANGUAGES

English, Filipino
